[Home](#) > The Global Launch of No More Epidemics

November 12, 2015 - 11:00am - 1:30pm

Venue:

The Nelson Mandela Centre of Memory 107 Central Street Johannesburg 2198, South Africa

No More Epidemics® is an international campaign to prevent future epidemics of emerging infectious disease. No single player can solve this problem alone. The campaign addresses this urgent challenge by bringing together nongovernmental organizations, top experts in health systems and humanitarian relief, community organizations, academic institutions, epidemiologists, scientists, and the most innovative companies and philanthropies in collaboration with national governments and international agencies, to influence governments and multilateral institutions to increase their epidemic prevention and preparedness capabilities.
