

Objectives

- Collaborate with GOK, MOH, private and faith based sectors to ensure uninterrupted access to medicines and health commodities through:
 - strengthened supply chain systems, sound policies, quality assurance and patient safety initiatives
- Strengthen systems for delivery of all health commodities while ensuring targets for priority programs (Malaria, HIV, RH/FP and TB) are met

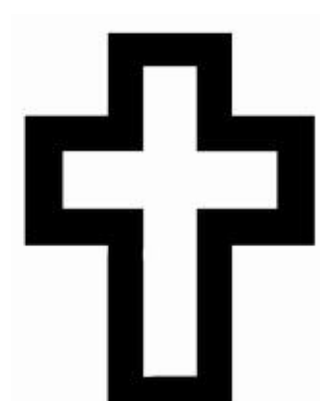

Our Clients

National and County level MOH
(National MOH departments, and County Health Management Teams)

Training Institutions
University of Nairobi
Kenya Medical Training College

Faith Based Organizations
(Kenya Conference of Catholic Bishops,
Christian Health Association of Kenya)

Kenya Medical Supplies Authority (KEMSA)
Mission for Essential Drugs & Supplies (MEDS)

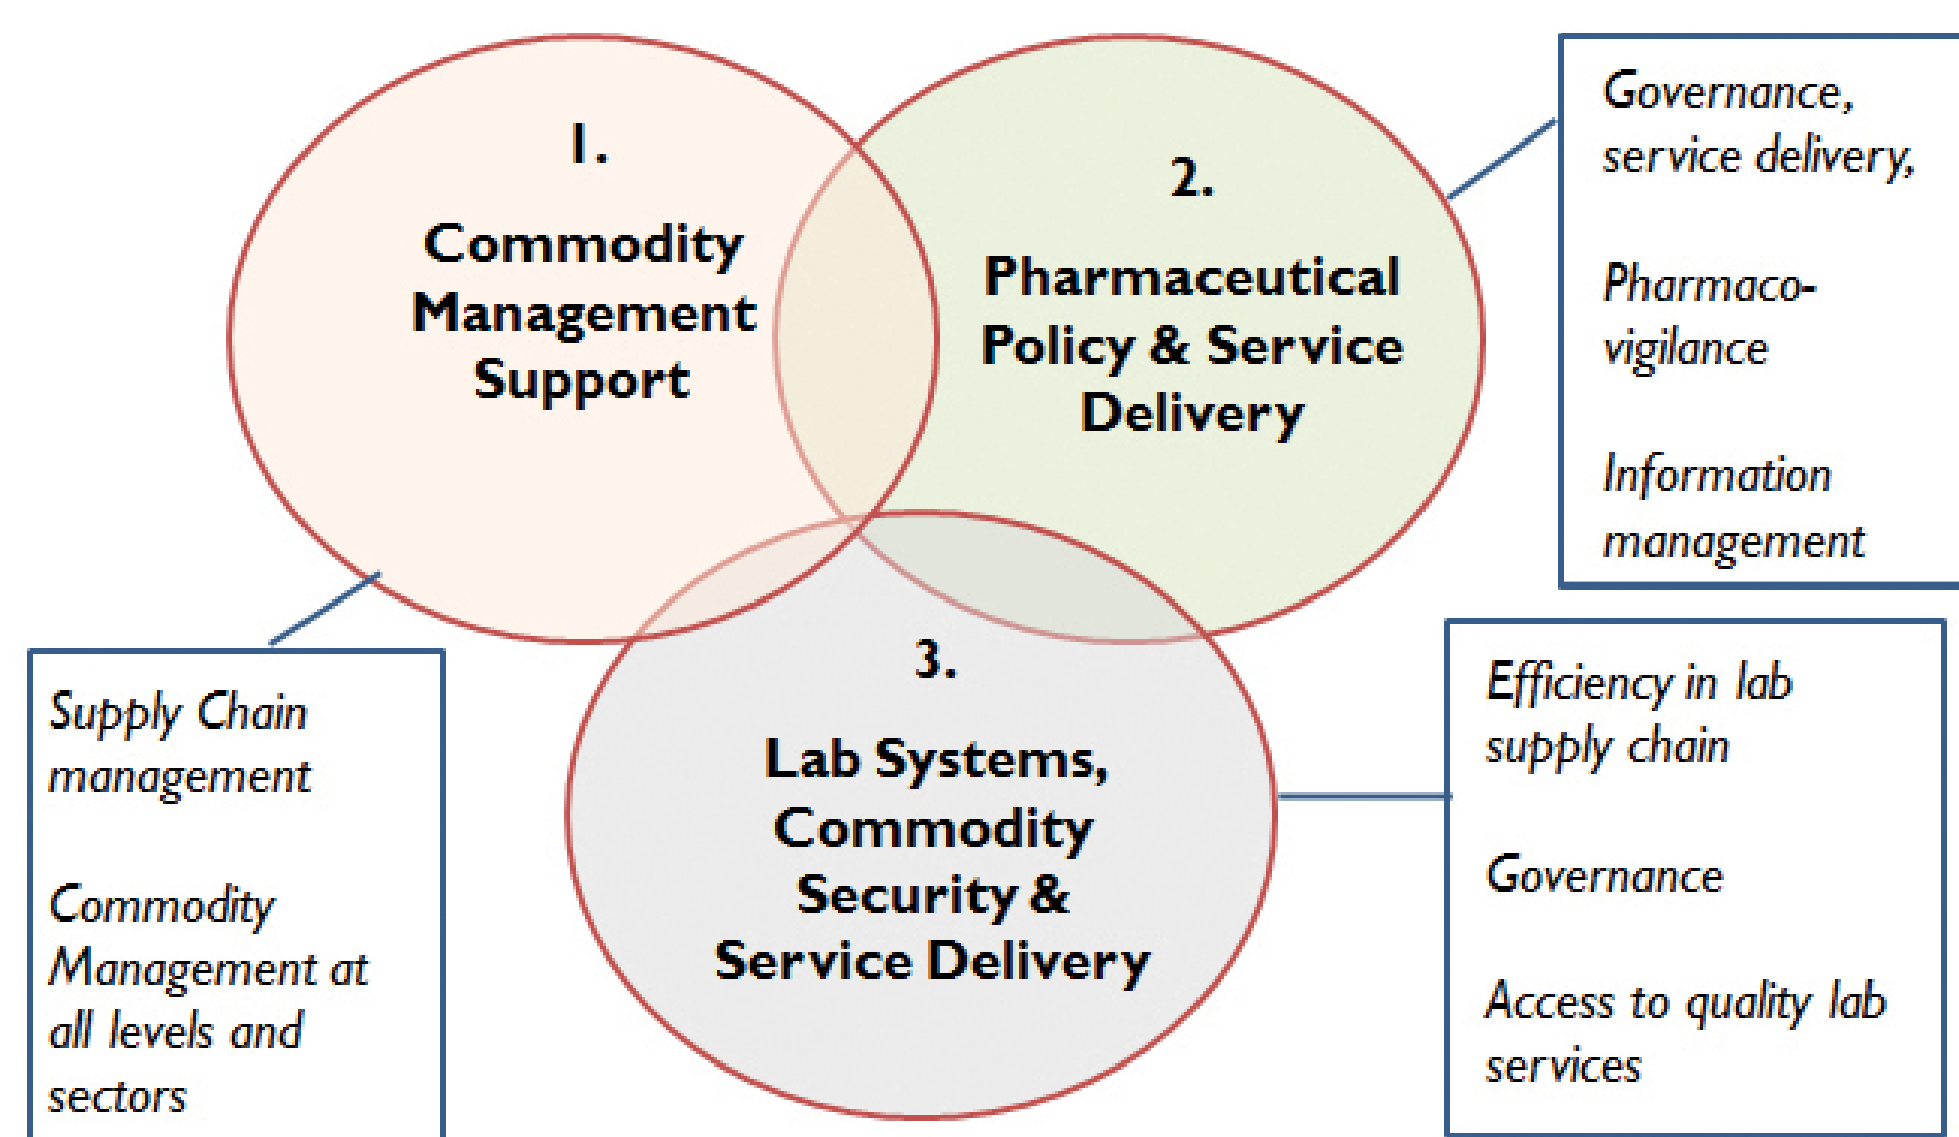

Professional Associations
Pharmaceutical Society of Kenya (PSK)
Kenya Pharmaceutical Association (KPA)

Regulatory Bodies
The Pharmacy and Poisons Board (PPB) and
Kenya Medical Laboratory Technicians and Technologist Board (KMLTTB)

Approach

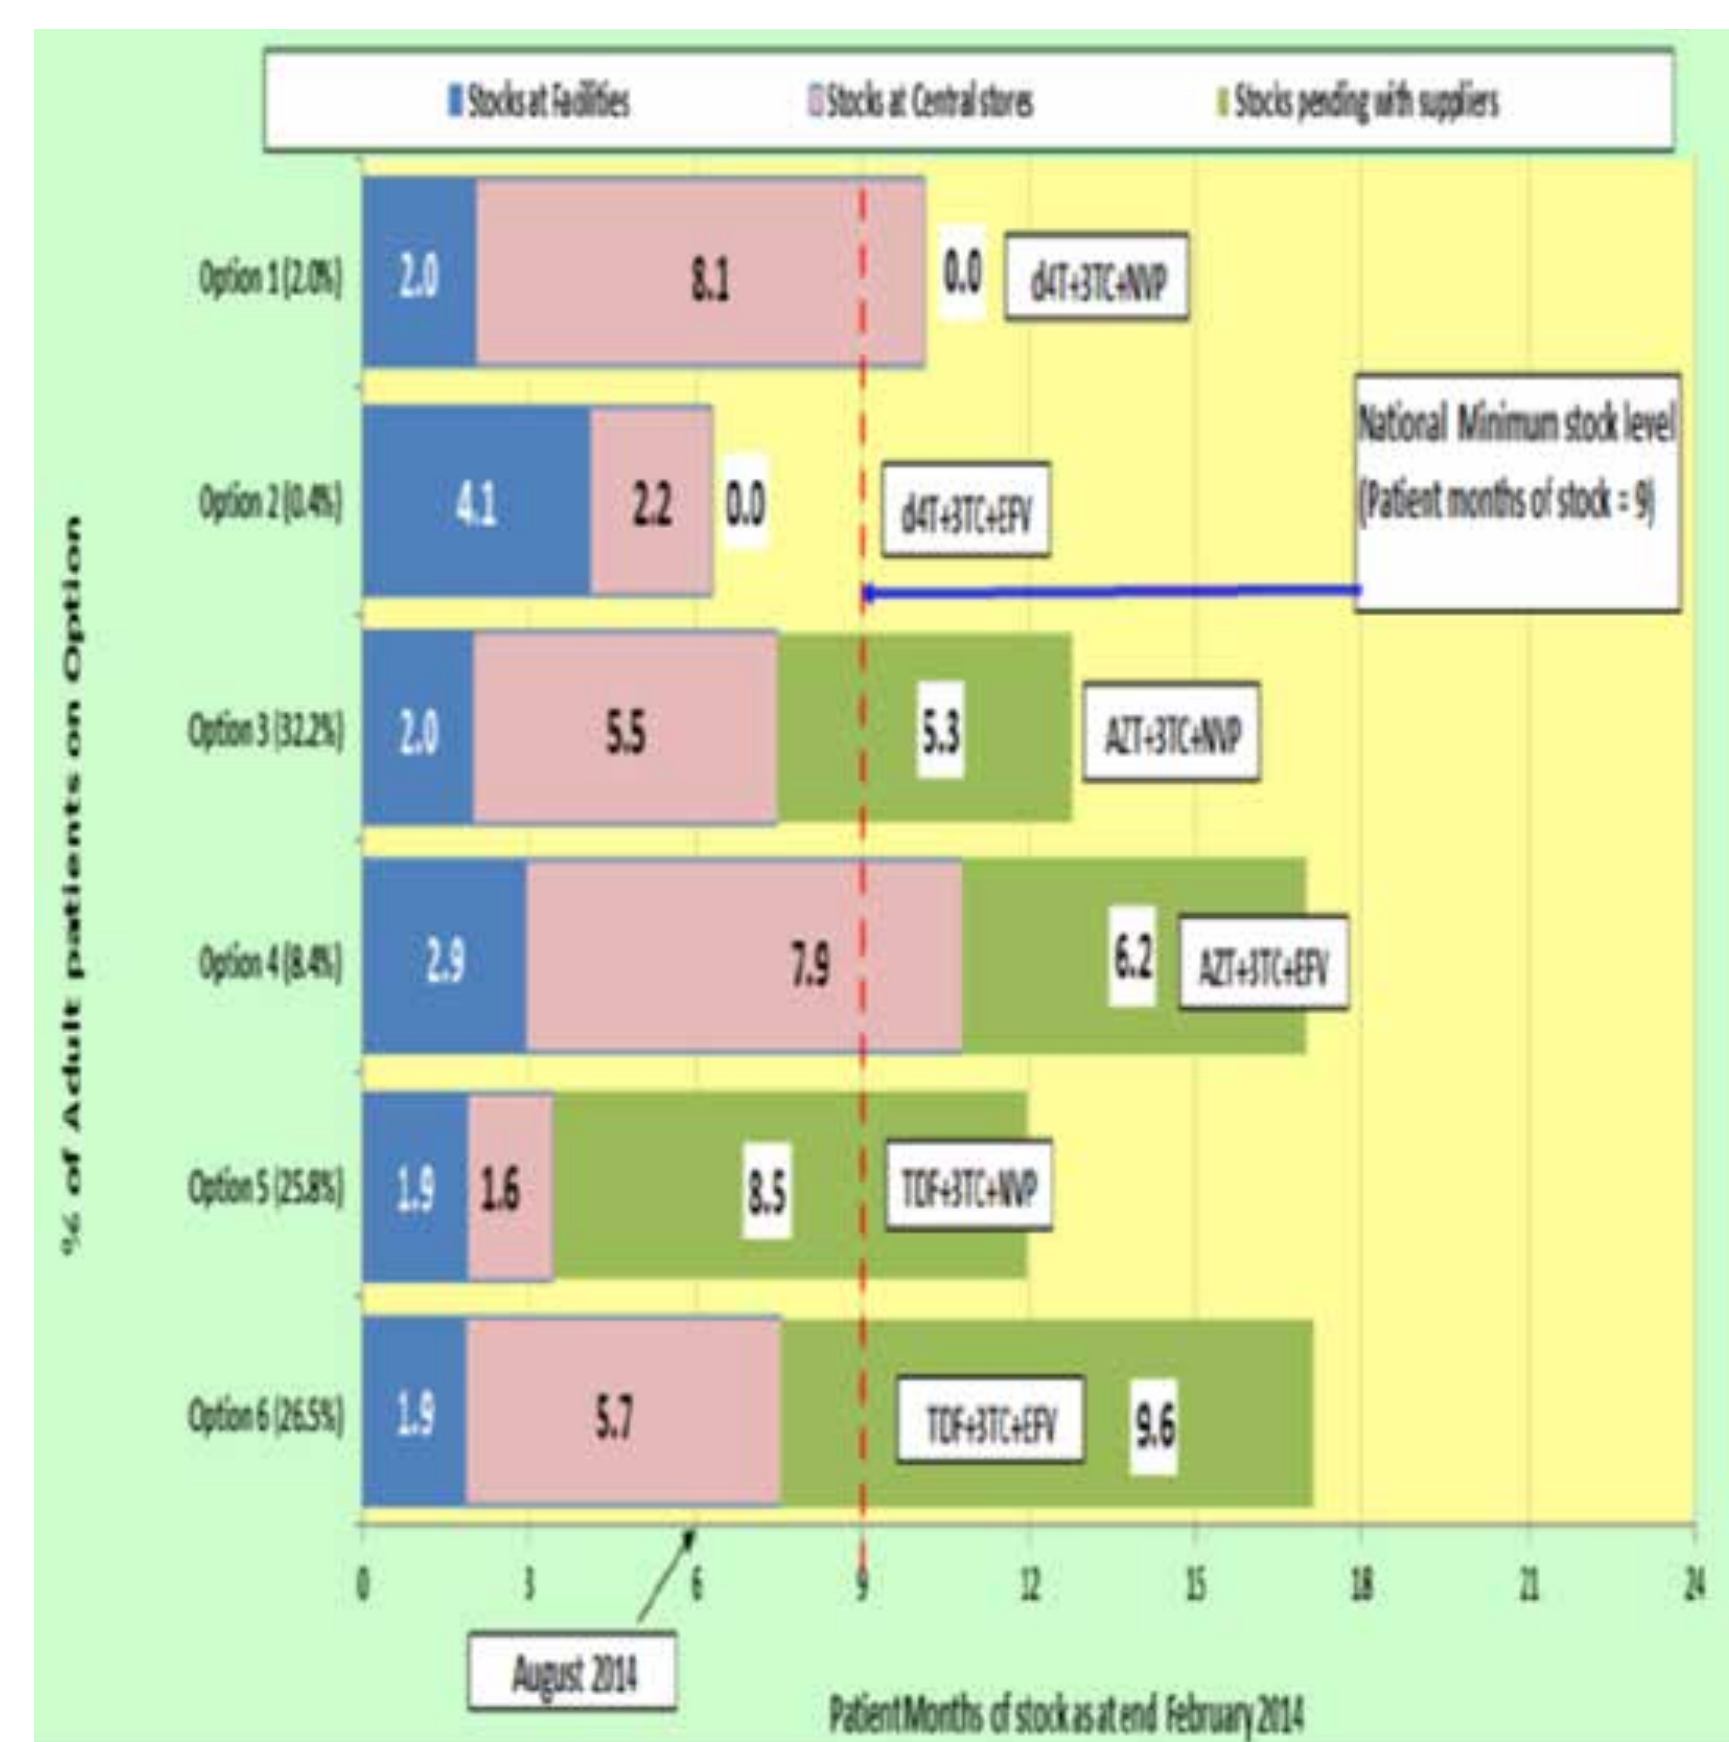

Key Achievements

- Supported the national MOH and public health programs (PHP) mainly NASCOP, RH/FP, Malaria, TB) to undertake forecasting and quantification.
 - The quantification reports have been used to mobilize resources, inform procurements, reduce stock-outs thereby increasing access to essential medicines and health technologies
- In collaboration with KEMRI-Welcome Trust we supported Malaria Control Program to undertake 7 rounds of Quality of care surveys to assess: adherence to treatment guidelines, availability of anti-malarial medicines and diagnostics
 - The findings indicate an increased availability of malaria diagnostics in health facilities up from 65% (Sept 2012) to 90% (June 2013) and malaria RDTs from 16.9% (Sept 2012) to 70% in June 2013.

Quantification and Pipeline Monitoring

- Supported the national MOH and public health programs (PHP) mainly NASCOP, RH/FP, Malaria, TB) to undertake forecasting and quantification.
- Supported all Priority Health Programs to undertake pipeline monitoring and develop national stock status reports for strategic information and decision making

Data sources: NASCOP, KEMSA & LMU, Kenya Pharma, MSH/HCSM

Strengthened commodity management

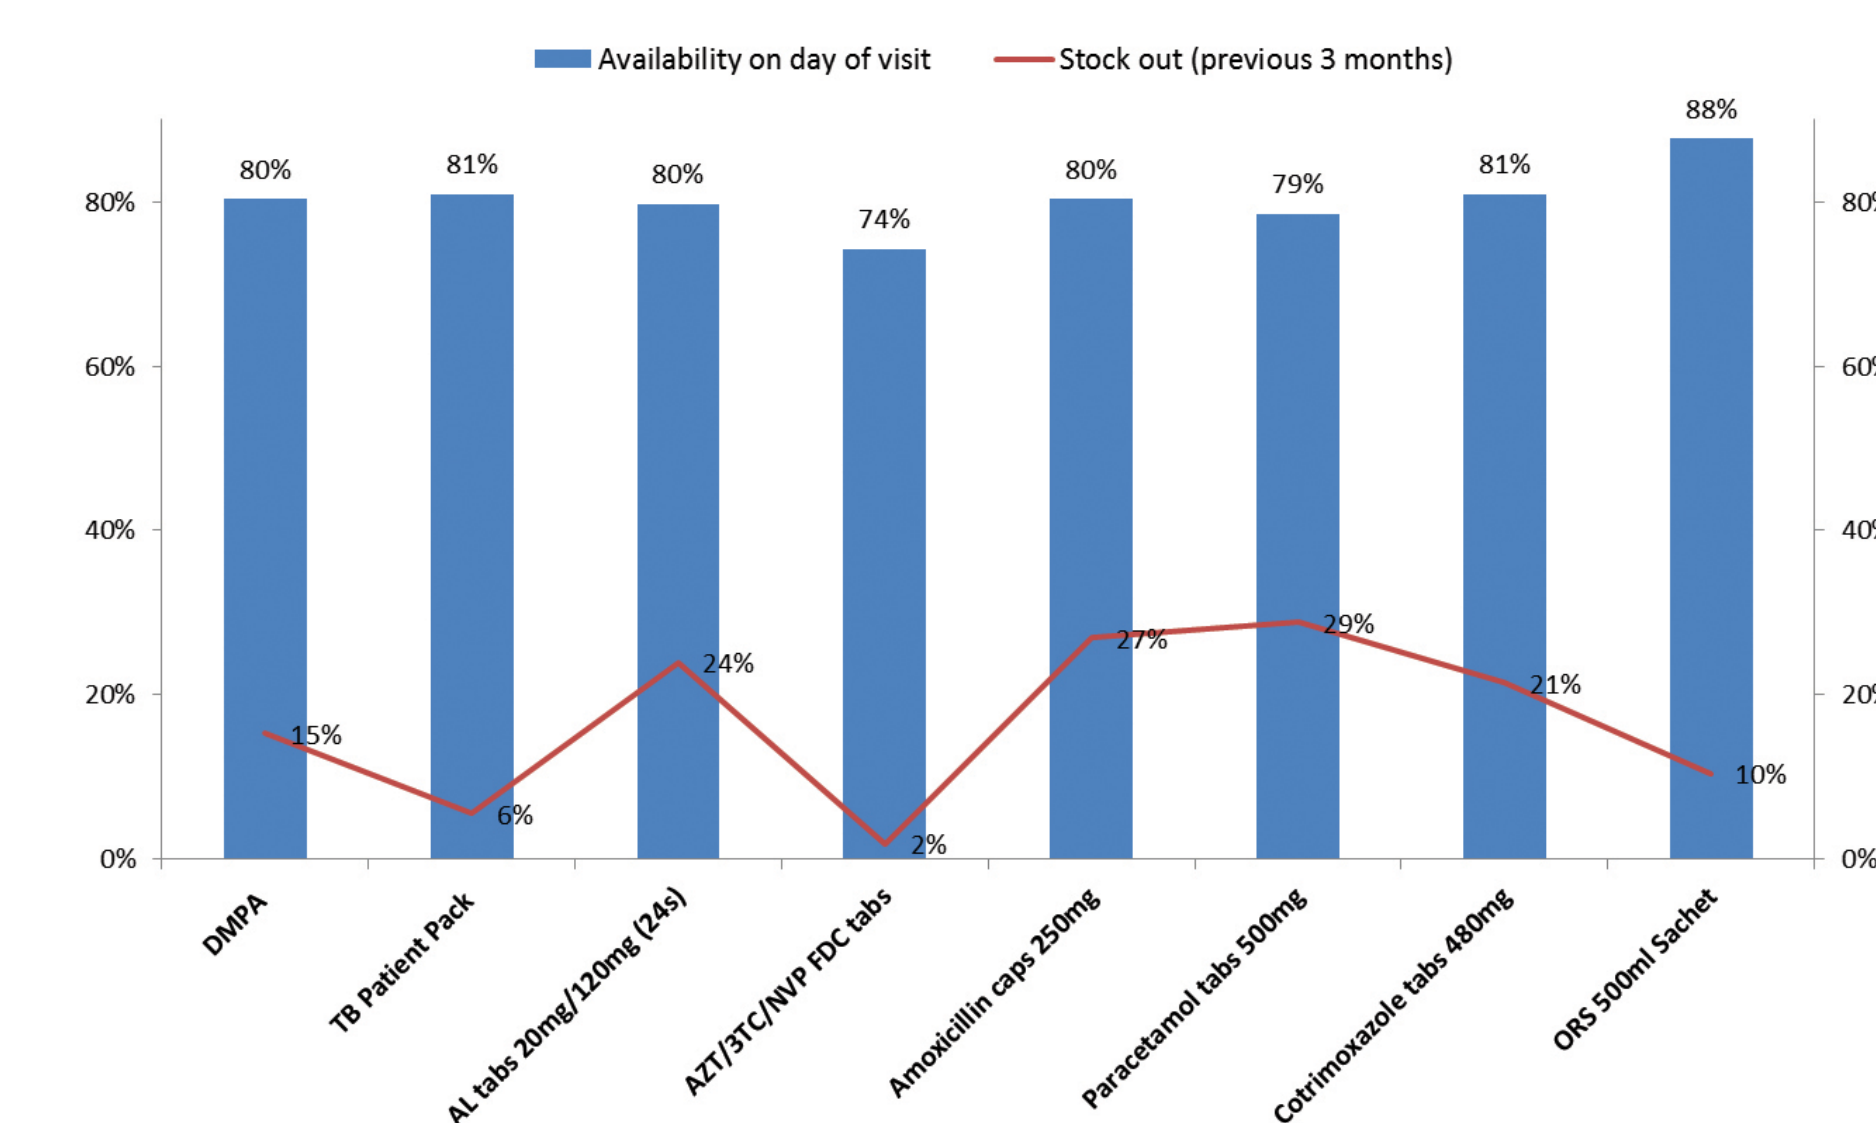

- Supported the MOH to develop the 1st Kenya Essential Medical Laboratory Commodity List
- 3,000 front line health workers in the use of Rapid Diagnostics Tests (RDTs)
- Supported institutional and human resource capacity for peripheral health facilities to account and manage health commodities effectively hence:
 - Increased reporting rates for health commodities e.g. for ARVs maintained at over 80%

Key Achievements

- Availability of the essential medicines list and pharmaceutical service charters at facilities increased from 16% and 15% at baseline in 2011 to 53.5% and 29% respectively in November 2012 and to 65.0% and 35.7% in June 2013

Availability of Health Commodities at health facilities in 13 counties (Dec 2013)

Strengthened pharmaceutical policy and services

- Collaborated with MOH, WHO and other stakeholders to develop/review and disseminate standard treatment guidelines and essential commodity lists e.g.
 - National STGs, Kenya Essential Medicine List, Cancer guidelines
 - Jointly with WHO and DANIDA, supported the development of the Kenya National Pharmaceutical policy (KNPP) now KNPP session # 4, 2012
- Jointly with MOH, WHO, DANIDA, regulatory bodies and other stakeholders supporting:
 - the review of the pharmacy laws and development of harmonized regulatory framework for health products and technologies
- Supported development and launch of the Kenyatta National Hospital (KNH) formulary, the 1st comprehensive one in Kenya.

- Supported the PPB to implement a country-led integrated national pharmacovigilance system
- Cumulatively the PPB had received about 8000 reports on ADRs and 565 poor quality medicines by : Over 90% of ADR reports were ARV-related

Collaboration between MSH, PPB and other stakeholders has resulted in regulatory decision being undertaken and the Kenyan PV system being recognized globally.
